

(Dr. R. Mutave and Dr. B.Mua)

Dr. Regina Mutave, Dean School of Dental Sciences attended a meeting to welcome the incoming Chairman, Department of Periodontology/Community and Preventive Dentistry. During the meeting, the Dean presented the department with materials for implant dentistry donated to the school by Dentium.

The Dean thanked department members for the support they accorded to her when she served as Chairman of the Department (2013 – April 2017) and requested them to support the new Chairman, Dr. Bernard Mua.

Dr. Mua takes over a very healthy department both in terms of staff, equipment and materials. Dr. Mutave will be remembered for installing 8 new dental units in the Periodontology clinic through aggressively lobbying the University for financial support. She also left many equipment for community outreach and teaching (LCDs, Portable operators and chair) as a result of the Kenya Smiles project that she continues to coordinate.

The School's computer lab also benefited from wireless internet installation thanks to collaboration headed by Dr. Mutave with Columbia University from the year 2014. This has served the student community as the university was in the process of exploring wireless options.

Dr. Mutave was elected dean School of Dental Sciences on January 6th 2017.
